BOOST

“BOOSTing agribusiness acceleration and digital hub networking by an advanced training program on sustainable Precision Agriculture”

Deliverable: **D2.3 within Task T2.5**

Tasks titles: **Preparation of the educational platform**

Deliverable title: **Educational Platform**

Type: **R - Report**

Dissemination level: **SEN**

Lead partner: **REZOS**

Authors: **Dimitrios Tsolis, Christos Karras, Christina Korovila**

Reviewers: **Partners and External Evaluators**

Due date of deliverable: **December 14, 2023**

Actual submission date: **November 14, 2023**

D2.3 Educational Platform

Executive Summary

The present deliverable focuses on the design and implementation of the BOOST project's digital educational platform. The overall rationale underpinning the platform's development is that it realizes two functional roles. It serves as a digital educational platform as well as an online Hub gathering information, contacts, opportunities, tutorials, webinars etc, offered to trainees, newcomers and key stakeholders of the agri-food and sustainable PA sector.

Moreover, this platform, sets the basis for establishing a Network where accredited experts in agrifood, academic-experts, businesses, local facilitators, startupers, students as well as recruitment agencies, would have the opportunity to access basic info, free online webinars oriented to this topic of interest and seek for collaborations or offering collaboration in this sector.
