

Erasmus⁺ Programme (ERASMUS) **BOOST**

“BOOSTing agribusiness acceleration and digital hub networking by an advanced training program on sustainable Precision Agriculture”

Deliverable: **D3.2 within Task T3.3**

Tasks title: **T3.3 Developing the final BOOST “Precision Agriculture Educational Package”**

Deliverable title: **BOOST improvements action plan**

Type: **R - Report**

Dissemination level: **SEN**

Lead partner: **AUTH**

Author(s): **Aikaterini Paltaki**

Reviewers: **All partners and External Evaluators**

Due date of deliverable: **14/10/2024**

Actual submission date: **14/10/2024**

Executive Summary

The successful submission of the previous deliverable of WP3, D3.1 entitled "BOOST Prototype Evaluation Report" had captured some very valuable feedback from the trainees who attended the Pilot prototype training sessions. In addition, evaluation questionnaires filled out by the trainees provided key insights into some of the important features of the educational package. From these findings, a number of constructive suggestions were made to refine and enhance the training materials.

This current report, D3.2, presents the BOOST Improvements Action Plan, which offers a formalized route to making such improvements. Specific responsibilities for all partner organizations are identified, informed by clearly defined roles evident from their earlier contributions within the development of the educational material. Additionally, comprehensive workflows and procedures will be applied in order to optimize individual productivity and ensure seamless collaboration across all project partners. This plan also defines deadlines within the task timeline to ensure timely execution, while guidance toward the wanted improvements is given in the collaboration process.
